The company acts on an international level and develops projects from hospitality and residential, headquarters, retail and urban design as well as masterplanning **since 1980**.

A profound respect for the soul of the place and a sensitive approach to the brand's individuality is key for the teams of 70 **architects, interior, product and graphic designers** who work from micro to macro, are interdisciplinary and highly qualified in the management of complex projects. Their work focuses on aesthetic durability, technological longevity, and the future lifespan of buildings and products.

Maintaining a sensitive approach to the client's vision, the studio believes in trust and longterm relationships. Seeking change without giving up traditional values, the teams operate in line with the industry's trends. Authentic creativity and the constant search for technologically innovative solutions are as important as the experience in dealing with flexible budgets and **cost engineering**.

Specializing in various segments of hospitality, with a particular focus on luxury hotel projects and residences with character, Matteo Thun + Partners provides customized and **turnkey concepts** including architecture, interiors and lighting concepts. The work of the company is based on aesthetic and technological durability with a strong belief on **healthy living**. The guest (lat: Hospes) and wellbeing are at the core of Matteo Thun & Partners projects. This also determines the studio's healthcare projects where the relationship between patients and their physical environment is the point of departure.

Matteo Thun + Partners' architecture and interior design is the result of a deep dialogue between the client's prospect, the location, its residents and its culture.

Founder at Matteo Thun + Partners

"Only if you dare to do something new, to cross borders, you can experience new knowledge".

This is the driving energy of Matteo Thun's work. The Milan based architect and designer was born and raised in the bilingual German and Italian speaking region of South Tyrol, Italy. After studies with Oskar Kokoschka and at the Architecture University of Florence, he co-founded the 'Memphis' group in Milan in 1981 with Ettore Sottsass. In 1984 he opened his own studio in Milan, in 2001 he founded Matteo Thun + Partners.

ANTONIO RODRIGUEZ

They established an architecture, interior, styling and product design firm, with offices in Milan and Shanghai, creating and developing specific Asian projects with Italian creativity. The constant research for simplicity and functionality generates timeless and iconic design, away from being solely visual or zeitgeisty. The proven competence in product and interior design is based on the close dialogue with clients' technical experts always striving for innovation.
