

FALPER

Washbasin System by Matteo Thun & Antonio Rodriguez

FALPER Washbasin

Pure Design with extensible Parts

Walnut wood, copper and white ceramics are the basic materials of this Washbasin concept.

The elliptically shaped ceramic washbasin floats weightlessly on the delicate but solid construction of hardwood and copper. The faucet and a free-floating shelf, both also in copper, complete the design. This approach forms the core of an in many variations extensible concept, depending on room size and room usage.
