

FIREFLY in the sky
Designed by Matteo Thun for Panzeri

Firefly in the sky – a love affair.

Think of a Firefly's glow. During the high season in mid-June and every summer it is fascinating to see them light up their surrounding. We associate a firefly's glow with a warm and relaxed atmosphere.

The light-series Firefly in the sky is as capable as its role models that cluster in glowing clouds each summer. Wireless, dimmable and only 24 cm high, it is as likeable as it is efficient. Its proportion is iconic; if it was tall, it would be the ideal floor lamp. But Firefly in the sky is designed to light up a table – both inside and out – whether on a private balcony or hotel terrace.

Firefly in the sky is a tiny lamp with a massive impact.

Matteo Thun

M I L A N O

The lamp is ideal for public use, restaurants or bars. The head, containing its intelligent working parts, can be removed easily, while the base can be fixed or kept on the table. The appealing, graceful lamp comes in different finishes and can also be customized.

FACTS

- Magnetic coupling system
- Rechargeable battery via USB-C, LED source
- Step DIM control with 5 light intensity settings
