

TUBINO Lamp
Designed by Matteo Thun for Panzeri

Tubino – a torch system.

The approach? A stick becomes a torch, recalling the ancient method of sparking fire from a sliver of wood. The challenge? Design a series that prioritizes normality, simplicity and assures durability. Tubino is a modern method of illumination: the perfect light-focus at the head of the bed granting both direct and indirect light. An adjustable table and floor lamp, Tubino can turn its torch 360°, while a wall light version creates an indirect light source. Tubino Plus is dimmable and features a textile cable. Finishes: white, black, bronze, titanium and champagne.

Matteo Thun: "As a reference point in the lighting sector, Panzeris' excellence in manufacturing and their cutting-edge techniques enabled us to realize a light series that exactly matches our needs".
