

DAFNE Armchair
Designed by Matteo Thun for Piaval

Craftsmanship, Timelessness, Functionality.

Especially designed for our ongoing project "Hospital Campus" in Germany, DAFNE embodies all aspects needed for a pure but graceful armchair.

The DAFNE armchair represents the meeting place of aesthetic clarity and functional ingenuity, of artisan expertise and cutting edge technology, of sensorial material quality and long-lasting durability. Its simple but precise shape comes from years of research into the design of well-being.

The collaboration between Matteo Thun and Piaval speaks to the fundamental values of both groups: a strict adherence to honouring their shared principles of hospitality, comfort and timeless design.

Matteo Thun: "Above all DAFNE stands for simplicity, for technical and aesthetic durability. The chair unifies comfort, functionality, lightness and traditional craftsmanship".
